

Pharmacy
Credentialing
Resource

The industry's single
source-of-truth and standard
for capturing and sharing
self-reported pharmacy
credentialing data.

Created by the industry, resQ™ offers secure, complete, and up-to-date pharmacy information to streamline your credentialing efforts, comply with government regulations, improve network directories and expedite claims processing and adjudication.

- Source-of-truth for pharmacy credentials
- Stores electronic copies of supporting documentation
- Sends automatic notifications about expiring credentials to pharmacies
- Annual attestation of profile accuracy
- Easily integrates into existing systems
- Online real-time look up tool
- Multiple file delivery options

For more information, visit www.resq.ncpdp.org
or send an email to resq@ncpdp.org

Pharmacy Data

Captured. Completed. Credentialed.

Data Collection

Pharmacy Credentialing Resource

- Developed by the industry - for the industry
- Standardized credentialing requirements

Data Verification

RxMonitored™

- Continuous roster monitoring: Licensing, DEA, OIG, SAM, and state sanctions
- Comprehensive verification solution for CFR 455
- Exchanges data with your existing systems without disruptive and costly integrations
 - Verification of malpractice liability insurance with monthly review
 - Site inspection capabilities by pharmacy techs
 - Seamless integration with resQ™

NCPDP and Medversant, the healthcare industry's premier pharmacy data information and verification providers, have partnered to offer an end-to-end pharmacy credentialing solution.

Together – resQ™ and RxMonitored™ - will fulfill your organization's credentialing, accreditation and compliance requirements while maintaining the highest level of quality and accuracy.
